Bathroom Lighting

Aqua

bathe in light

Good lighting is invaluable in the bathroom, an area that requires both bright light – so you can see what you’re doing – and gentle general lighting that’s comfortable and pleasant to use first thing in the morning or at night.

AQUA lighting fits these needs perfectly. It’s a complete range of ready-to-install luminaires designed specifically for the bathroom. It provides clear, bright instant-on light in areas where you need it most while creating a calm and pleasant atmosphere overall. What’s more, AQUA is carefully constructed to be safe and long lasting in a water environment, as well as easy to install and maintain.

Your safety first

When it comes to choosing lighting for the bathroom, safety comes first. That’s why AQUA exceeds even the strictest European safety standards and regulations for bathroom lighting. It also offers a wide range of official IP (Ingress Protection) ratings that offer different levels of waterproofing for each bathroom need.

To ensure each light is as quick and easy to fit as possible, AQUA requires minimal assembly and comes with everything it needs to work right out of the box, most products even including a light bulb. On top of that, the packaging and instruction manuals have easy-to-follow directions for installation and indicate its suitability for different bathroom zones as defined by national and European standards.

Whether you are looking for a wall light, a ceiling light, mounted or recessed spots, with AQUA you’ll always be able to find the lighting solution you’re looking for, illuminating your bathroom in a way that suits your needs perfectly.
